Rev. 7/13
In addition to providing state-of-the-art clinical care, our physicians are devoted to research and education. The research is broad in nature, encompassing multiple disciplines and departments at the WSU School of Medicine and other institutions. Our research programs include a variety of clinical trials in both benign and malignant conditions and an emphasis on translational bench-to-bedside approaches. Our educational mission involves teaching medical students, residents and practicing urologists. Our urology residency training program prepares residents for advanced fellowship training, academia or private practice.

Services Include:
- General urology
- Urinary stones
- Urologic oncology
- Female urology
- Male infertility and sexual dysfunction
- Surgical endoscopy, laparoscopy
- Advanced robotic surgery
- Reconstructive surgery

Additional services include urodynamic studies, including post void residual and urine flow rate, cystoscopies, penile Doppler studies, bladder scan, prostate biopsies, vasectomy, minimally-invasive BPH treatments and other office-based procedures. Outpatient and inpatient surgeries are conducted at area hospitals and include robotic surgery of the prostate, bladder, kidney and adrenal gland, InterStim Therapy®, cryoablation, brachytherapy, extracorporeal shock-wave lithotripsy, urethroplasty and other reconstructive procedures.

> Medical Research and Teaching

Strengthen Our Mission

In addition to providing state-of-the-art clinical care, our physicians are devoted to research and education. Our educational mission involves teaching medical students, residents and practicing urologists. Our urology residency training program prepares residents for advanced fellowship training, academia or private practice.

> Advancing Medicine to Patients

Throughout Southeast Michigan

The academic environment at Wayne State University allows our board-certified physicians to bring the latest and most up-to-date technologies and treatment approaches to our patients. We have subspecialty expertise in urologic oncology, kidney stones, bladder function and incontinence, sexual medicine, reconstructive urology and minimally invasive surgery using state-of-the-art robotic and image-guided techniques. Our specialists are committed to raising the standards of care in the community for patients suffering from a variety of urological conditions.

With the vision and leadership of our board-certified urologic physicians and specialists, UPG Urology has developed into one of the nation’s leading providers of urological care. UPG urology specialists provide personalized care in a comfortable environment, making sure you understand your diagnosis and treatment plan.
